DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 6, and 9-24 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for " $A_x\text{CoO}_2$ " where x is not less than 0.2 and not more than 1, does not reasonably provide enablement for " ACoO_2 ". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. Applicant is not enabled for a chemical composition wherein A is present with a subscript of "1" (one). When the variable is removed, a subscript of "1" (one) is assumed. For instance, the lack of a subscript following Co means the subscript of "1" is assumed. Applicant is only enabled for a composition where x is not less than 0.2 and not more than 1, as clearly disclosed in the instant specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4, 6, and 9-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has amended claim 1 to remove "x" from the formula " $A_x\text{CoO}_2$ ". Upon removal of the subscript and introduction of A' and A" the formula reads " $\text{A}'\text{CoO}_2$ " and " $\text{A}''\text{CoO}_2$ ". When a subscript is not present, the value of "1" (one) is assumed to be present. Applicant has removed the

Art Unit: 1775

subscript and therefore has modified the formula to reflect “1” as the subscript modifying “A” and “A”. Furthermore, claim 2 then establishes a variable that is not present in claim 1. The formula as currently written in claim 1 has no variable.

Response to Arguments

Applicant's amendments have overcome the rejection over Cho '269.

Applicant's amendments have not overcome the 112, second paragraph rejection, and have necessitated the new grounds of rejection under 112, first paragraph, as stated above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
